

## AddonSoftware System-Wide Features

Version 7.0

Since 1981, AddonSoftware has developed practical, affordable, feature-rich, and easy-to-use enterprise-wide software applications for businesses. The companies who use AddonSoftware enjoy The Freedom to Grow™ because of its lean efficiency, its scalability, and the experienced professionals who customize and support it.

### The Foundation

AddonSoftware is built on a foundation that contains the technical resources used by the entire system, from inquiry methods to printing to data management.

For example, you can activate *SpeedSearch™*, an immediate, secure inquiry feature, from any point on any screen. With “one-click lookups” you’ll be able to immediately find everything the computer knows about customers, vendors, and inventory items without leaving your current task. This feature eliminates innumerable trips to the file cabinet and enables a whole new level of customer service.

See a “snapshot” view of your company’s financial details by accessing “Executive Summary.” Sales orders, accounts receivable, accounts payable, and cash flow information are displayed. You can view totals for several months or day-by-day details for selected months.

Some of the system-wide features in AddonSoftware include:

- *SpeedSearch* - immediate secure data inquiry
- *Executive Summary* - the executive’s daily dashboard business snapshot
- Save reports to file for analysis and later printing
- Print Preview for reports
- Email and fax any report or document to anyone at any time
- System security and confidentiality control
- Single or multiple company processing – up to 100 companies
- Access full On-Line Help provided in HTML from a central server for quick and easy access by all users.

- Source code is included for support and peace of mind
- Move from workstation to workstation and your printer assignments stay with you. Output assignments (e.g. printers, fax, etc.) are made by user and up to 18 assignments may be assigned to each user ID.
- Print Sales Analysis and General Ledger reports directly to Microsoft Excel®

## AddOnSoftware Reporting Options

- Ability to output reports & documents to fax, email, HTML, Adobe® PDF both on the fly and pre-set by vendor or customer for selected documents
- Ability to save reports for later printing and/or on line review
- ODBC and JDBC compliant database for external report writers, including Crystal Reports®
- Prints laser forms, including customer invoices, vendor purchase orders, and custom reports
- Electronic document & report storage with HTML and PDF documents
- Direct connection to MS Excel® for “instant reporting” of all reports from Sales Analysis.

## GENERAL™ Report Writer

- Create your own custom reports from any AddOnSoftware application
- Access to entire AddOnSoftware database through data dictionary
- “Prompt” feature speeds report creation
- Add reports to AddOnSoftware menus

## Jet Reports™

- Jet Reports is an Excel-based report writer
- Create custom reports from any AddOnSoftware application
- Utilize all the features of Microsoft Excel, including charting
- Access to entire AddOnSoftware database through data dictionary
- Creates reports directly in Excel
- Reports may be published to a website automatically using “autopilot”

AddOnSoftware Version 7 is available for the Linux, UNIX, and Windows operating systems and may be run using PRO/5®, Visual PRO/5®, and BBJ® by BASIS International Ltd.

All AddOnSoftware applications are fully integrated.
